EDUCATION

University of Southern California (USC), Viterbi School of Engineering

Los Angeles, CA

Master of Science in Engineering Management

August 2025-May 2027

- **Coursework:** Engineering Project Management, Engineering Management of System Integration, Economic Analysis of Engineering Projects, Leading and Managing Engineering Teams

Lakshmi Narain College of Technology and Science

Bhopal, India

Bachelor of Technology in Computer Science & Engineering

August 2018-June 2022

SKILLS

- **Business & Management:** Project Coordination, Agile & Waterfall Methodologies, Software Development Lifecycle (SDLC), Cross-functional Collaboration, Stakeholder Engagement, Risk & Issue Tracking, Documentation & Reporting, Decision-making, Analytical Thinking & Problem-Solving, Effective Communication
- **Tools and Languages:** Jira, Confluence, MS Project, Microsoft Office Suite (Excel, PowerPoint, Word), Google Workspace, Python, SQL, JavaScript, Google Dialogflow, NVIDIA ACE Agent, Power BI, Tableau, Asana

EXPERIENCE

Quantiphi

Mumbai, India

Senior Conversational Bot Engineer

August 2022-July 2025

- Owned WBS and milestone schedule for 3 multilingual AI agents and managed scope and budget compliance through launch, meeting 100% of success criteria on time
- Ran weekly status meetings and executive readouts using Jira dashboards and Smartsheet timelines, tracking risks, dependencies, and action items to establish a continuous improvement cycle that accelerated delivery by 20%
- Designed and deployed an LLM intent classifier (96% micro-F1), optimized services to reduce p95 latency by 25%, and validated production-parity environments to ensure reliable releases
- Built bilingual (English/Spanish) voice bots using Google Dialogflow CX with Datastores/BigQuery, automated call-flow workflows, and translated BRDs into epics and stories with acceptance criteria, reducing L1 workload by 40%
- Delivered a RAG-based shopping assistant with governed releases via CAB processes and change logs, and showcased the solution at NVIDIA GTC 2024 with 25% conversion uplift projected from a 4-week pilot
- Coordinated APAC/AMER handoffs using RACI matrices and readiness checklists to deploy AI solutions across retail, telecom, and healthcare clients
- Built consistent test plans, runbooks, and risk logs, and enforced quality checks and reviews, reducing defect leakage by 23% and improving reliability

Persistent Systems

Nagpur, India

Salesforce Developer Intern

December 2021-June 2022

- Trained on the Salesforce platform and applied that knowledge to build secure, configurable components by learning development best practices, customization, and integration techniques
- Converted requirements into user stories and testable acceptance criteria in Jira, maintained meeting notes and progress reports to keep delivery aligned for a financial-services project

Uday Communication

Vidisha, India

Sales & Operations Development

June 2020-June 2021

- Supported day-to-day sales and delivery operations for an automobile spare parts business, coordinating order fulfillment and customer interactions across 50-60 retail accounts to maintain consistent service levels
- Worked directly with retailers to analyze product demand, recommend specific product lines, and onboard new clients through incentive programs, improving sell-through across different spare parts and contributing to an estimated 10-15% increase in active retail accounts

PROJECTS

Smart USC Event Ticketing & Crowd Management System

- Led a feasibility and planning study to improve event entry operations, projecting 40% reduction in attendee verification effort, and improving entry throughput and crowd flow during large-scale campus events
- Applied agile planning and risk management to define scope and milestones, and developed a weighted trade study, WBS, and high-level system plan to evaluate solution options, manage constraints, and support data-driven decision-making

Trojan Home: USC Housing Mobile Application

- Designed and structured a comprehensive project plan for a USC Housing platform intended for 45,000+ students, defining MVP features across housing search, roommate matching, and a student marketplace
- Developed risk mitigation plans, milestone dependencies, and formal change control guidelines to maintain scope clarity and alignment across roadmap, schedule, and budget planning
